

Aircraft Performance

This seminar reviews the basics of aircraft performance, including the four forces of flight, and explains the practical implications. Topics of discussion include: applying drag curves, selecting the proper takeoff, maximizing climb performance, and improving no-engine glides. The seminar is a good introduction for new pilots and an excellent review for experienced pilots.

Directions: Follow signs for Peter O. Knight Airport. Park in front of FBO. The conference room is in the West Building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
